

COMVISION

TECHNICAL SUPPORT

Comvision specialise in the development, installation and maintenance of advanced security systems for the security, surveillance and communication markets. Our engineers are highly trained and are available 24/7 to support our Quality Maintenance Plan customers.

MAINTENANCE SOLUTIONS

Our Platinum service is a full comprehensive maintenance program. This provides a worry free maintenance service covering all hardware and labour requirements to keep your system running at optimum performance.

Our Gold and Silver service provides for regular maintenance inspections with discounted training and labour rates.

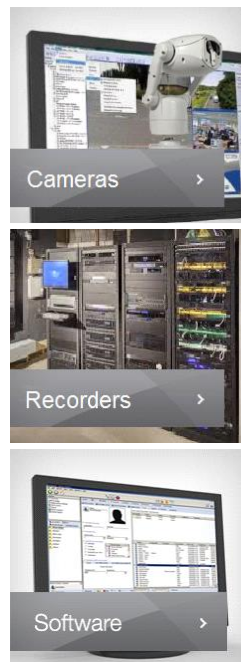

Attendance Management Bundle \$920.00 +GST and Install

Shift-workers or students can now be tracked by something that is only unique to themselves in person...fingerprints. Use the time and date for clock on and clock off on jobs.

High speed matching algorithm quickly scans and processes the fingerprint maximizing user convenience. Bypass card capability provides a means to grant access for those with badly damaged fingerprints.

CCTV Bundle starting from \$2500.00 + GST and Install

Our CCTV management system is complemented by our wide range of IP cameras offering both static and fully functional, indoor and outdoor + vandal resistant domes or traditional box housings.

Specialist HD & megapixel cameras complete our range. Utilise White Light deterrent, video analytics or 180 degree views from a single camera.

Thermal, motion detection, extreme low light and Infra-Red cameras are available with an easy to maintain video archive capable of capturing up to 25 frames a second so that no action is missed.

Integrated Access Control Bundle starting from \$2250.00 + GST and Install

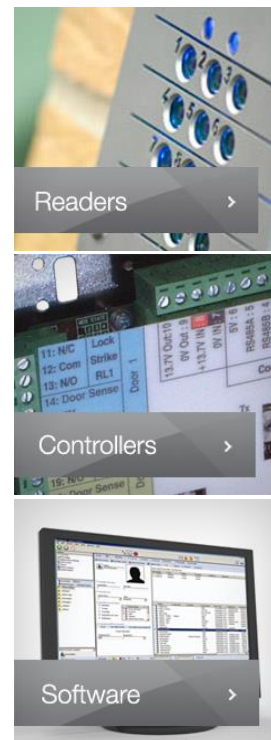

We'd introduce an IP access control system that heightens your organization's security and increases your readiness to respond to incidents.

An example is that any door that is forced can be set-up to capture CCTV footage to interrogate. Auto-set access times, alarm arming and control back room access. You can even use the system for tracking movements of staff by running reports.

We can leverage your existing network and security equipment with intuitive security software and hardware.

Use as much or as little of our intelligent systems to suit your budget whilst reducing the insurance liability on the business.

Comvision can offer hardwired keyless controlled entry or if cabling is an issue a wireless alternative.

Intruder Alarm Bundle starting from \$2250.00 +GST and Install

We can leverage your existing network and security equipment with intuitive security software and hardware.

Set and forget with auto arming technology. Duress calls can now be monitored remotely by the business owner on his or her smart phone with image streamed automatically with an alert.

Comvision can offer hardwired or if cabling is an issue a wireless alternative.

Fully Integrated Security Bundle Including CCTV, Intruder and Access Control starting from \$5900.00 + GST and Install
